

WRITING PIECE 1

Don't Litter Please!

Dear Neighbours

I have seen a lot of people leaving their rubbish on the ground, this can cause a lot of trouble. People should not litter.

Firstly, it is bad for the environment. We need trees to breathe and plants to eat, when you litter, the plastic can get stuck on the poor trees or the plants. When we do that, we have less fruits to eat and less air.

Secondly, if we leave rubbish on the ground, it can blow away into the ocean, then the little sea creatures will think that it's food and eat it. They will choke on the plastic and will get stuck in it.

Thirdly, if we leave rubbish on the ground, it will hurt anything or anyone. Imagine that people keep littering and no one picks it up, it will turn into a huge mess. Wherever you go, the rubbish will always follow you. People will not survive long in that mess.

In conclusion, I strongly believe we should not litter. Help nature to be more clean and peaceful, if you find any rubbish on the ground, you should always pick it up. Maybe in your spare time, you can spend one hour picking up any rubbish near your house. Let's work together and make our world a better place.

WRITING PIECE 2

I CAN HELP THE WORLD!

Imagine walking down the streets of your city, seeing everyone's smiles have been washed from their face replaced with tears in their eyes. The smiles are now upside down. Their faces are puffy and swollen from crying. Their eyes are full of sorrow! The city is just a blanket of desolation and languish. The roads are dumped with rubbish, and the sky is grey with misery! This is the scary future of which would happen if the kindness has perished! The earth is now teeming with shadows. Friendship is rare in the community. Do you want our future to be like this? You wish that you could be a ray of light and make everyone happy again!

Let us start being kind today! Your help wouldn't just be an act of kindness; but a step forward to making our community full of mirth and happiness again! Firstly, we could bake chocolate chip cookies for everyone in our community! Cookies have a warm and savoury bite, making everyone feel glad inside. Smiles are contagious and once people feel happy, they pass it on. Soon everyone is full of jollity and mirth.
